Trilogy Solutions Announces 2005 Operating Results

Trilogy Solutions, LLC, a Cranbury, New Jersey based HP enterprise authorized channel partner and provider of design, implementation and IT consulting services, is pleased to announce full year 2005 operating results. Revenues for 2005, the Company's first full calendar year of operations, were \$4.6 million. Net income for the period was \$347,000.

Jeff Liebenthal, President of Trilogy Solutions, commented, "To date Trilogy Solutions' performance has been most gratifying. Our customer acceptance has been high and our working relationships with both HP who we represent and Avnet, our distributor, are strong. We have built a very active consulting practice in a variety of disciplines and are continuing to work to enhance our sales and technical personnel."

"Trilogy Solutions was solidly profitable in 2005, our first full calendar year and the trend is accelerating into 2006. We are working on many exciting projects and our customer base is growing. The synergies between Solutions and her sister company, Trilogy Leasing, are paying large dividends. Leasing customers are actively utilizing the services Solutions provides."

"It should be noted that a significant portion of the transactions that we engage in are supplied directly by HP and although Trilogy enjoys the margin on these transactions the total revenue would not be reflected in our financial statements. We 'sold' a great deal more than what is reflected in our revenues."

Trilogy Solutions is a majority owned subsidiary of Trilogy Systems (sole shareholder of Trilogy Leasing Co., LLC). The company is privately held but will continue to provide earnings information and other important updates through its website and press releases.
